

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-15. (canceled)

16. (previously presented) System and device for fixing a cloth and decorative elements to a table, comprising:

a mobile element;

a fixed element comprising i) a rectangular hollow shape shaped for attachment to an external edge of the table and ii) a front part comprising two projections which block the mobile element when inserted inside the fixed element; and

the mobile element comprising a flat rectangular surface with a dimension to fit into an inner space of the fixed element so that upper and lower sides of the mobile element are blocked by the two projections upon insertion of the cloth between the fixed element and the mobile element, wherein,

the fixed element has an upper part that is longer than a corresponding lower part and comprises a further projection which fits into an upper notch of the mobile element.

17. (currently amended) System and device as claimed in claim [[24]] 16, wherein the fixed element comprises a screw

hole (6) for receiving a screw to attach the fixed element to the table.

18. (currently amended) System and device as claimed in claim [[15]] 16, characterized in that the fixed element further comprises an adhesive or biadhesive.

19-20. (canceled)

21. (currently amended) System and device as claimed in claim [[19]] 16, in combination with the table and wherein the fixed element is applied over the entire length of the external edge of the table.

22. (currently amended) System and device as claimed in claim 21, characterized in that the upper notch ~~notches~~ of the mobile element has ~~have~~ a rounded shape.

23. (currently amended) System and device as claimed in claim 21, wherein the fixed element and the mobile element have proportional sizes compared with a size of the edge of the table.

24-26. (canceled)

27. (new) System and device for fixing a cloth and decorative elements to a table, comprising:

a mobile element;

a fixed element comprising i) a rectangular hollow shape shaped for attachment to an external edge of the table and ii) a front part comprising two projections which block the mobile element when inserted inside the fixed element; and

the mobile element comprising a flat rectangular surface with a dimension to fit into an inner space of the fixed element so that upper and lower sides of the mobile element are blocked by the two projections upon insertion of the cloth between the fixed element and the mobile element, wherein,

the fixed element has i) an upper part that is longer than a corresponding lower part and comprises a further projection which fits into an upper notch of the mobile element, and ii) a lower part that comprises another further projection which fits into a lower notch of the mobile element.

28. (new) System and device as claimed in claim 27, wherein, the upper notch and the lower notch of the mobile element each have a rounded shape.
